

GEDA 1500Z/ZP

TRANSPORT PLATFORM

The GEDA 1500 Z/ZP has two separate control systems and can be used either as a material hoist only or as a transport platform for passengers and materials.

The transport platform control with a speed of 12 m/min is activated for transporting passengers and materials. For transporting construction materials only, the device is switched to the material hoist mode with a lifting speed of 24 m/min.

One device, numerous possibilities: the double-mast GEDA 1500 Z/ZP transport platform ideally adapts to virtually any conditions on site thanks to the convenient modular system with different platform versions and different load capacities.
